CONTENTS

Vol. 29, No. 1, March, 1980

K. Ohe, T. Shirakawa, H. Yokoya, M. Onda, A. Noguchi, S. Uraki, M. Inoue and A. Miyoshi. Studies on the hydrogen ion back diffusion in patients with gastric ulcer. ····· 1-5

Y. Nishi. Zinc levels in plasma, erythrocyte and leukocyte in healthy children and adults. ····· 7-13

J. Iriuchijima. Effect of calcium antagonist, nifedipine, on blood pressure of various hypertensive rats. ····· 15-19

A. Miyoshi, K. Ohe, T. Inagawa, M. Inoue, S. Uraki, M. Tatsugami, A. Noguchi, M. Onda, H. Yokoya and T. Shirakawa. A statistical study on the age distribution of gastric secretion in patients with peptic ulcer. ····· 21-28

Vol. 29, No. 2, June, 1980

K. Onari, K. Sadamoto, M. Takaishi, T. Inamizu, T. Ikuta, N. Yorioka, S. Ishioka, M. Yamakido and Y. Nishimoto. Immunological studies on cigarette smokers. Part II Cell mediated immunity in cigarette smokers and the influence of the water-soluble fraction of cigarette smoke (WSF) on the immunity of mice. ····· 29-34

D. Dalimunthe, H. Hara, H. Hayashi, K. Mito and R. Kawate. Preliminary study on mononuclear cells insulin receptor in porcine blood. ····· 35-39

M. Manns, H. Kawakami and K. H. Meyer zum Buschenfelde. Liver membrane antigens —targets of humoral and cell mediated immunity in chronic active hepatitis—. ····· 41-47

S. Okahata. Mechanism of methyl viologen induced hemolysis. ····· 49-54

S. Takasugi, K. Fujii and N. Toki. Inhibitory effects of transamine on histamine release in the gastric mucosa. ····· 55-60

T. Onoda. Altered cell behavior of glucosamine requiring mutant derived from Chinese hamster lung cells. ····· 61-68

Y. Nishi. Zinc status in various diseases. ····· 69-74

T. Onoda, H. Saito and S. Note. Growth and Gl arrest of glucosamine requiring mutant cells derived from Chinese hamster lung cells. ····· 75-81

R. Matsuura, Y. Kagosaki, Y. Tanaka, H. Kashiwa, T. Sakano, Y. Kobayashi and T. Usui. A female case of chronic granulomatous disease (CGD) associated with chronic idiopathic thrombocytopenic purpura. ····· 83-86

M. Kobayashi, Y. Tanaka, N. Horino, T. Tanaka, K. Ueda, Y. Kobaymshi, T. Usui and N. Kamada. Philadelphia chromosome-positive acute leukemia with lymphoblastic characteristics. ····· 87-92

T. Onoda, H. Saito and S. Note. Growth and Gl arrest of glucosamine requiring mutant cells derived from Chinese hamster lung cells. ····· 75-81

R. Matsuura, Y. Kagosaki, Y. Tanaka, H. Kashiwa, T. Sakano, Y. Kobayashi and T. Usui. A female case of chronic granulomatous disease (CGD) associated with chronic idiopathic thrombocytopenic purpura. ····· 83-86

M. Kobayashi, Y. Tanaka, N. Horino, T. Tanaka, K. Ueda, Y. Kobaymshi, T. Usui and N. Kamada. Philadelphia chromosome-positive acute leukemia with lymphoblastic characteristics. ····· 87-92

Vol. 29, No. 3, September, 1980

J. Iriuchijima. Absence of operating hypertensive factors in pithed spontaneously hypertensive rats. ····93-96

M. Takaishi, N. Kodomari, M. Yamakido, K. Onari, T. Inamizu, N. Yorioka, M. Nakasaki, K. Sadamoto, T. Ikuta, S. Ishioka and Y. Nishimoto. Suppressor cells in man as a function of age. ····97-103

S. Imagawa. Symbrachydactyly: review of 50 cases and definition. ····105-115

M. Katoh. Studies of lysosomal enzymes in macrophages. I. Comparison of lysosomal enzyme activities in mouse peritoneal and pulmonary macrophages. ····117-123

T. Tanaka, M. Kobayashi, N. Horino, Y. Tanaka, K. Ueda and T. Usui. Biochemical activities of lysosomal enzymes in leukemic cells: the characteristic alterations of the enzyme levels in childhood acute leukemia. ····125-132

G. Kajiyama, S. Kubota, H. Sasaki, T. Kawamoto and A. Miyoshi. Lipid metabolism in the development of cholesterol gallstones in hamsters. I. Study on the relationship between serum and biliary lipids. ····133-141

Vol. 29, No. 4, December, 1980

S. Kubota, G. Kajiyama, H. Sasaki, T. Kawamoto and A. Miyoshi. Lipid metabolism in the development of cholesterol gallstones in hamsters. II. The effect of dietary cholesterol on biliary phospholipids and gallstone formation. ····143-153

E. Itoga. Spinocerebellar degeneration with divergence paralysis as the earliest sign. ····155-161

S. Tsukiai. Partial synthesis of hypothetical intermediates in biosynthesis of lithocholic acid from cholesterol, 3α-hydroxy-5β-cholestan-27-al and 5β-cholestane-3α, 27-diol. ····163-167

S. Imagawa. Symbrachydactyly: pathogenesis of 5-fluorouracil induced model in mice. ····169-181

M. Katoh. Studies of lysosomal enzymes in macrophages. II. Comparative study of the lysosomal enzyme activities in peritoneal macrophages from various strains of mice. ····183-187

S. Takasugi and N. Toki. Inhibitory effects of native and synthetic protease inhibitors on plasma proteases in acute pancreatitis ····189-194

N. Sakura, T. Usui and K. Ito. Purine metabolism in human lymphocyte subpopulations. I. Differences in the effect of 2′-deoxyguanosine and guanosine on human normal E- and EAC-rosette forming cells. ····195-201

D. Dalimunthe. A clinical study on insulin receptors of mononuclear cells in diabetes. ····203-218
